## BIO

“Hi, I’m Roy, a passionate front end developer and designer looking to be a part of shaping the future of technology. I’m a leader in Purdue Hackers, a student organization dedicated to creating technical projects with over 300 members. Aside from tech, I’m into film, climbing, and yoyoing.”

## EDUCATION

**Purdue University**, West Lafayette, IN

May 2017

- Bachelor of Science in Computer Science
- GPA 3.48/4.0

## TECHNICAL SKILLS

### Day-To-Day Comfort

- JavaScript, React.js, HTML/CSS, Java, Git, Sass, Adobe Creative Suite

### Have Experience With

- Python, C, Ruby on Rails, Node.js, Heroku, AJAX, Meteor

## WORK EXPERIENCE

**PicnicHealth**, San Francisco, CA

Summer 2015

Front End Engineering Intern

- Upgraded the entire front-end from Backbone & EJS to a faster, modular React-based architecture
- Implemented a new pricing tier leading to a massive surge in customer sign-ups
- Oversaw all front end design decisions for new app features

**Air Force Institute of Technology**, Dayton, OH

Summer 2014

Software Engineering Intern

- Developed embedded satellite software in C
- Created a bus messaging framework for single board computers

## PROJECTS

### Edibble

Winter 2015

Pebble App + Intel Edison App (challengepost.com/software/edibble)

- Made a Pebble App that communicates with a Node.js server to enable restaurant patrons to request services from their waiters/waitresses
- Placed in the Top 30 hacks at PennApps

### Amish Harvest Hero

Spring 2014

Web game (amishhero.com)

- Created a web game in which a player harvests falling vegetables and avoids falling devices
- Built using JavaScript and the Adobe Creative Suite
